Since 1991, In-Depth Data cc has been building software solutions to meet the land information and geo-spatial needs of its numerous clients, both local and international. Utilising the latest, best of breed software tools our solutions enable our clients to become more effective in meeting their business challenges.

Building flexible land information & GIS solutions since 1991

AGILE SOFTWARE MANIFESTO

We subscribe to the principles of the Agile Software Manifesto. These principles include:

- Our highest priority is to satisfy the customer through early and continuous delivery of valuable software.
- Welcome changing requirements, even late in development. Agile processes harness change for the customer's competitive advantage.
- Deliver working software frequently, from a couple of weeks to a couple of months, with a preference to the shorter timescale.
- Simplicity--the art of maximizing the amount of work not done--is essential.

PROPERTY REGISTER SOLUTIONS

In-Depth Data owns and develops Planner Municipal Software™, the premier South African municipal property register software system.

Yet, we are more than just a software company; we build and integrate property registers using data supplied from councils, the deed office and GIS data. Our aim is a clean database.

Data quality impacts on the complete life cycle of an organization. If you manage your data you manage your business. Poor data quality has a negative impact on compliance, policies, procedures, practices, and the architecture of your business.

CUSTOM SOLUTIONS

We understand your needs may be unique. Our software solutions can be customized to suit your requirements. .

WEB SOLUTIONS

We design solutions to effectively leverage of the latest web based technology, whether it is for your intranet or internet requirements.

OUR PARTNERSHIP PHILOSOPHY

We seek out cooperative, value adding relationships between companies and individuals. To this end we have established a number of strategic partnerships. We aspire to become an effective and efficient virtual organization.
